# Modernise your digital workplace and accelerate Microsoft 365 Copilot success

Digital transformation through an AI evolution

Copilot provides organisations with an opportunity to reimagine productivity, enrich employee experiences, reinvent customer engagement and reshape business processes.

Copilot leverages the power of AI to unlock economic benefits for the organisation and help it to evolve beyond "digital debt" or typically increased time spent on tasks such as tackling long email threads, catching up on missed team meeting minutes and managing multiple documents across multiple information repositories.

- User Adoption
- Workplace & Communication Analytics

Productivity

- Employee Development and Onboarding
- Skills Development

- Data Classification

Information Management

- Retention and Defensible Disposal

- Policy Enforcement
- Compliance Monitor
- Lifecycle Management

Governance

Backup

- Cyber Threat Protection
- Ransom Detection
- Multi-SaaS Disaster Recovery

- Cloud to Cloud
- On-premise to Cloud
- On-premise to On-premise
- Self-hosted or SaaS

Migration

Optimisation

- ROT Clean-up
- Storage Optimisation
- License Optimisation

Why Econocom & Ingentive?

With Econocom's expertise in B2B IT solutions combined with Ingentive's Miscrosoft expertise, we are extremely well equipped to make the adoption of Copilot a smooth operation for your business. We will remove all the guesswork for you and provide a comprehensive implementation process tailored to your desired business outcomes.

Econocom are accustomed to pioneering new developments in technology to give our clients an edge over the competition. Ingentive are uniquely placed to understand not only the benefits cognitive AI can bring to your organisation, but also the importance in making sure you get it right, first time.

Confidence Platform

Control Suite for Governance

Establish an operational model for SaaS collaboration:
Centralise management and administration, but delegate functions to different roles or business units as needed.

Security, Audit and Regulatory Controls:
Implement, enforce, and prove that access and configuration policies are providing ongoing compliance with internal or regulatory requirements.

Access Management and Risk Assessment:
Gain insight into who has access to what and where the business is at risk.

Cost Optimisation and Service Consolidation:
Budget and maximise ROI for SaaS subscriptions and entitlements.

Modernisation Suite for Transformation

Migration:
Move and transform legacy data into modern cloud SaaS platforms.

M&A and Content Restructuring:
Merge, split, and re-organise your content and collaborate workspace to reflect ongoing business changes.

LOB and Industry Solutions:
Leverage modern technology and innovations to transform legacy business processes.

Enable & Measure Transformation:
Equip your workforce to leverage new innovations and measure engagement and transformation across the organisation.

Resilience Suite for Data Protection & Compliance

Business Continuity and Data Protection:
Protect against ransomware, accidental deletions, user error, and disasters.

Scan and Protect Content:
Automate tagging, classification, protection to protect data and prevent loss.

Storage Optimisation:
Prune stale or unneeded content from active systems to save cost and improve quality, but retain for future use.

Record Management:
Automate content compliance and records retention with purpose-built tools for RM teams.

Microsoft 365 Copilot45

Experience the power of seamless integration with the Ingentive Microsoft 365 Copilot45 program. Designed with your organisation's success in mind, their comprehensive engagement package is tailored to fast-track the deployment of Microsoft 365 Copilot within your workflows.

Unlock the full potential of Copilot through immersive workshops, expert assessments, and personalised guidance sessions. Discover how Copilot features align with your specific needs and explore its transformative capabilities firsthand. With their proven BOOST Centre of Excellence methodology, we provide the foundation for sustained success. **We have one goal: deliver tangible value within 45 days with a proof of concept or pilot deployment.** Experience the immediate impact of Copilot as a core solution, supported by adoption materials and ongoing guidance for expansion. Empower your organisation to drive innovation and efficiency with Microsoft 365 Copilot.
