

Simplify Your Windows 11 Upgrade with Econocom

Seamless refresh, deployment, management, and scalability for all companies

End-user devices are one of the most important elements of your IT estate. They're the critical tools that your users need to perform their day-to-day tasks and keep the business operational.

Well-designed and effectively deployed, the right device strategy can unlock some exciting opportunities for business improvement – empowering users with productivity-boosting AI tools like Microsoft Copilot, unlocking cost savings, and supporting ESG initiatives.

The need to migrate to Windows 11 draws this into sharp focus. While many organisations may approach the upcoming Windows 10 end-of-support as an unwanted challenge, it presents the perfect opportunity to get more value from your device estate, especially when supported by an expert partner.

As Europe's first digital general contractor, working with Econocom gives you the independent expertise and scalability you need to develop your device strategy as your business grows, supported by locally delivered, flexible services.

Our service portfolio

Our comprehensive suite of services work for you at every stage of your device lifecycle, from deployment to disposal, ensuring a device strategy that maximises productivity, enhances security and ensures best commercials.

As part of your migration to Windows 11, we can release value from outgoing devices to subsidise new device deployments, support them 24/7/365, and securely collect devices and wipe their data, ready for future refreshes.

Plan	Procure	Deploy	Manage	Retire
Infrastructure, security and device estate assessments.	3-5 year finance options – including licensing & labour costs.	Asset tagging and MDM enrolment.	1st to 3rd line service desk, including hardware break-fix.	Recycling and asset disposal to release value.
Establishing employee device choice programmes.	Stock holding and supply.	Software deployment.	Identity and access management (IAM).	Compliant data management and destruction.
Persona-to-device mapping.	30-day credit extensions.	True zero-touch deployment, direct from Econocom.	EDR/MDR/XDR security tools.	Secure device collection with tracked vehicles.
Copilot45 – our AI readiness programme.	Software licencing.	Bespoke device builds and imaging.	Compliance and governance.	Subsidising future device refreshes with outgoing assets.

Deploy future-ready devices **with ease**

With our flexible finance options, you can easily roll all of your services and the cost of new devices into a single monthly fee over a period of 3-5 years, simplifying the deployment of cutting-edge technology like AI-enabled PCs. You can access all of the expertise to support your entire device lifecycle as an ongoing Opex expense, without any unexpected Capex investments blowing unwanted holes in your IT budget for 2025.

Finance customers are also automatically enrolled into i.Tem, our device inventory portal, which allows you to track and order new devices from a centralised portal, lightening admin burdens and making it even easier to roll out new devices to your users – even if they're fully remote.

Harness the full benefits of **Windows 11**

Our extensive services portfolio helps you streamline the adoption of Windows 11 across your organisation and set you up to take full advantage of its powerful AI features.

Copilot 45, our AI readiness programme delivered in collaboration with Ingentive, gets you AI-ready in just 45 days, so you can hit the ground running with Windows 11's suite of AI features, and meet demands from the wider business to start taking full advantage of Copilot.

Beyond the lifecycle

Outside of our core portfolio, we've also curated an ecosystem of expertly-delivered services which extend beyond the standard confines of the device lifecycle, including:

- End-user training
- Employee on- and off-boarding
- Digital signage
- Network and storage infrastructure
- Cloud services

World-class **technology partners**

Whatever your requirement, our extensive vendor relationships and product knowledge help align the needs of both your business and your users with the ideal device:
